South Texas MEDICAL CENTER

MAP AND INFORMATION

southtexasmed.com

WELCOME TO THE SOUTH TEXAS MEDICAL CENTER

Wander into the heart of this 900+ acre area and you'll see a large sculpture on the grounds of The University of Texas Health Science Center.

Created by San Antonio artist Richard Harrell Rogers, it represents the double helix, the spiral pattern within DNA.

Just as that particle of matter represents the plan for growing life, this map represents the plan of a Medical Center first dreamed by city leaders more than 60 years ago. As you'll see, we've been growing ever since – in geographical size, in members, and in the sophistication and impact of the medical teaching, research, technology, testing and treatment we offer.

In short, we've come to play a vital role in the health of San Antonio and South Texas. And whatever reason brings you here, we hope we can be of help.

Visit **southtexasmed.com** to receive up-to-date news and information about the South Texas Medical Center (STMC).

FACILITIES

Beginning with a single hospital opening in 1963, the STMC is made up of over 75 medically related institutions, more than 45 clinics, 12 major hospitals, 1 higher education institution, and countless small practices, offices and non-medical businesses.

The result is a professional community that is extensive in capability, surprisingly synergistic, and dynamic in its impact – not just on healthcare, but on contributions to medical research and service to patients worldwide. Add to that all of the service, hospitality and retail businesses needed by people who work and live here, and you essentially have a city within a city.

The Medical Center Alliance (MCA) was formed in 1998 to address mobility congestion through street improvements and signage enhancement and to promote the continued economic growth of the STMC.

The MCA's membership is made up of the seven largest employers/landowners in the STMC:

- Audie L. Murphy Memorial VA Hospital
- Methodist Healthcare System
- Methodist Healthcare Ministries
- San Antonio Medical Foundation
- University Health System
- The University of Texas MD Anderson Cancer Center
- UT Health San Antonio

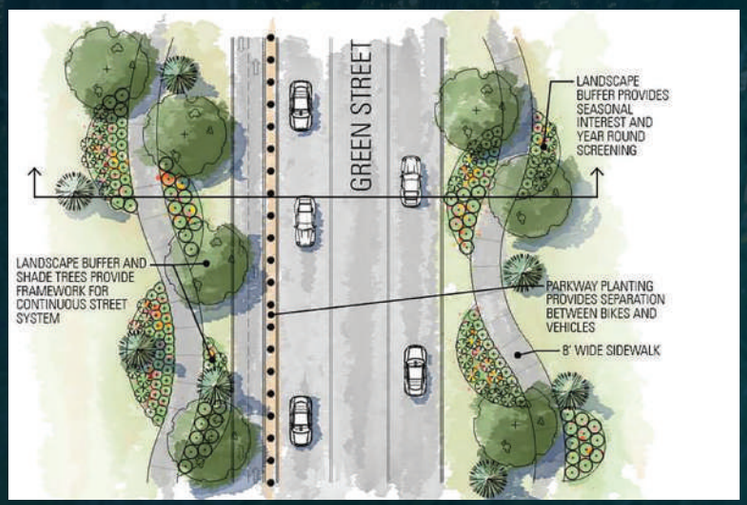
Since its inception, the MCA has partnered with the City of San Antonio, leading to the completion and upgrade of major STMC intersections, as well as new wayfinding signage throughout the area. This represents approximately $100 million for infrastructure improvements. The MCA is also committed to numerous initiatives to heighten awareness of the STMC as a valuable resource and an asset to this community and the South Texas area as a whole.

GROWTH OF THE MEDICAL CENTER

Located in northwest San Antonio, the STMC has experienced tremendous growth and is now a major hub of healthcare, education and research entities. Amid this rapid growth, we are taking steps to ensure the safety and wellness of our visitors and pedestrians.

REPURPOSING OPEN SPACE

The following three principles advance our vision of repurposing "open space" to elevate the STMC as a "healthy place." Examples include the Floyd Curl Greenstreet and future Hamilton Wolfe Greenstreet.



1. Lead with Human Centric Planning

Retaining and attracting the best talent for the STMC calls for a physical environment that appeals to you — the people who live, dine and go to work here — and keeps you safe.

Our goal is to provide places for activities such as group picnics, outdoor classes, and recreation, as well as a system of parks, trails and greenstreets that:

- Promotes healthy lifestyles
- Prioritizes pedestrian safety
- Fosters community cohesion

2. Pedestrian Connectivity and Activity

We plan to create more walkable connections between activity hubs using trail networks that will:

- Be pedestrian- and bicyclist-friendly corridors
- Encourage physical activity
- Include integrated signage and wayfinding systems

3. Streetscape Design

A streetscape with a wider pedestrian realm enhances pedestrian safety. We plan to accomplish this with the following design elements:

- **Parkway Planting Strips** will serve as a buffer between cyclists and vehicle traffic while adding a valuable aesthetic.
- **Dedicated Bike Lanes** will be separated from vehicle traffic by a street planter and will accommodate two-way traffic.
- **Street Trees** will be installed within planter strips along both sides of all streets to provide shade and species diversity.

The Floyd Curl Greenstreet — An Amenity for All

The Floyd Curl Greenstreet is a 1.7 mile long segment of wide sidewalk buffered from traffic with a dedicated, off-street cycle track. This enables safe access for all users, including walkers, joggers, cyclists, bus riders and cars.

The Greenstreet is designed to improve the physical spaces of the STMC in a way that promotes health and wellness. Healthy workplaces and better patient outcomes are supported by the creation of a network of trails, sidewalks and open spaces, which encourage physical activity and contact with nature.

We are funding a similar Greenstreet on Hamilton Wolfe Road. These two Greenstreets are the foundation of a significant network of trails, sidewalks and bike lanes which will make the STMC a more attractive, livable, and healthier district for residents, employees and patients alike.

ECONOMIC IMPACT*

The STMC is simultaneously a major employer and economic engine in the community. STMC economic contributions (direct, indirect, and induced) to Bexar County in 2018:

- Generated total output (revenues) of **$7.7 billion**
- Supported **63,560 jobs**
- Paid **$3.1 billion in wages** and salaries
- Conducted over **$300 million** in biomedical and healthcare research
- Brought over **$104.6 million** in estimated state revenues, mainly from sales tax
- Contributed **$94.8 million** in annual revenues, primarily from property and sales tax, for the City of San Antonio, Bexar County, and other local institutions
